PROFESSIONAL SUMMARY

AI-focused full-stack developer building end-to-end applications with Generative AI, agentic workflows and modern web technologies. Skilled in Python, React and backend development, with 235+ problems solved on LeetCode and a focus on practical problem-solving.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 8.6/10.0

Intermediate (Class XII)	2023 - 2024
MDS Public School	Grade: 91.2%

Matriculation (Class X)	2021 - 2022
St Gregorios Sr. Sec. School	Grade: 93.0%

PROJECTS

Insurance Claims Adjudication Agent ([Github](#)) ([Demo](#)) August 2026

- **Objective:** Built an AI-powered system to automate insurance claim analysis by extracting claim information and identifying relevant policy clauses.
- **Features:** Includes policy document retrieval, relevance evaluation, query rewriting, automated claim decisions and confidence-based human escalation.
- **Tech Stack:** Built using Python, FastAPI, PostgreSQL, LangGraph, BM25Plus, Groq, SQLAlchemy and JWT.
- **Skills Gained:** Learned agentic workflow design, information retrieval, confidence-based decision systems, RBAC and backend API development.
- **Impact:** Developed an automated claims workflow that combines AI reasoning with human-in-the-loop escalation.

InterviAI - AI-Powered Technical Interview Platform ([Github](#)) ([Demo](#)) July 2026

- **Objective:** Built an AI-powered technical interview platform that analyzes resumes, generates role-specific questions and conducts adaptive interviews.
- **Features:** Includes AI-based answer evaluation, adaptive follow-up questions, voice-based interviews, resume parsing and structured interview reports.
- **Tech Stack:** Built using Python, FastAPI, React, PostgreSQL, LangGraph, Groq Whisper, SQLAlchemy and Pydantic.
- **Skills Gained:** Learned agentic workflows, LLM evaluation, LangGraph, API development, database integration and full-stack development.
- **Impact:** Created an end-to-end AI interview experience with adaptive questioning and automated evaluation.

FinBud - Personal Finance Management Platform ([Github](#)) ([Demo](#)) November 2025

- **Objective:** Developed a full-stack personal finance platform to help users manage transactions and understand their spending patterns.
- **Features:** Includes transaction management, category-wise spending analysis, monthly trends, interactive dashboards, filtering and PDF report generation.
- **Tech Stack:** Built using React, Node.js, Express.js, MongoDB, Mongoose, JWT, Recharts, html2canvas and jsPDF.
- **Skills Gained:** Learned full-stack development, REST API design, MongoDB aggregation, authentication, data visualization and report generation.
- **Impact:** Delivered a complete personal finance management experience with interactive analytics and automated financial reports.

CERTIFICATIONS

Hack4Delhi Netaji Subhas University of Technology (NSUT), Delhi ([Link](#)) January 2026
Shortlisted for the final round of Hack4Delhi and selected to present the team's solution (URBANIQ) at NSUT, Delhi.

Plinth 2026 Ideathon LNM Institute of Information Technology (LNMIIT), Jaipur ([Link](#)) January 2026
Developed CivicSense AI, an AI-powered platform that simplifies complex legal documents into easy-to-understand language and guides users with relevant next steps. Shortlisted for the final round and selected to present the solution at LNMIIT, Jaipur.

SKILLS

Computer Language: Python, HTML, CSS, JavaScript, TypeScript

Databases & Data Tools: MySQL, MongoDB, PostgreSQL

Cloud & DevOps: Git and Github, API testing, Postman

Frameworks & Libraries: Next.js, Tailwind CSS, React, Node.js, Express JS, FastAPI

AI & Generative AI: LLM, Generative AI, RAG, LangGraph, LangChain
